

SPLASH

NEW SPA & POOL PRODUCTS

EVOSUS

Evosus Business Management Software, designed specifically for the pool and spa industry, has announced the release of version 6.4. Dealers on v6.4 can now merge duplicate inventory items, add new inventory items on the fly and create schedule rules based on day of week, technician, quadrant, route, task or product category. Back office staff will save time with automatically recurring accounting transactions and mass printing/email capabilities.

DELTAUV

DeltaUV has a new and improved Clean Light Technology UV system specifically designed for sanitation of new and existing ponds, fountains and water features. The EP series uses UV-C ray lamps to destroy microorganisms like viruses, bacteria, algae, yeast and mold by penetrating their DNA and permanently deactivating their germ cell metabolism so they cannot reproduce. Ideal for ponds with fish or other aquatic life, the EP series is environmentally friendly with the added benefit of being able to discard UV-treated water to waste.

LAMOTTE

LaMotte Company announces the new one-dip Insta-TEST Biguanide test strip. The new formula is designed to stabilize color reactions and prevent cross-contamination between pads. The test strip measures biguanide (0 - 80 ppm), alkalinity (0 - 240 ppm), pH (6.2 - 9.0) and hardness (0 - 800 ppm). The strip offer users accurate, fast results in just 10 seconds. There are 25 test strips packaged in a hinged, waterproof PopTop bottle with desiccant liner that protects the strips from moisture intrusion. The bottles are blister-carded with 12 units per case (code 2938-12).
